JK ALUMINUM INNER FENDER LINERS
Smittybilt’s new JK Fender Liners bring form and function to the next level. These corrosion-resistant aluminum liners hug the inside of your fenders and protect your engine bay from debris and contamination. The easy-to-install design features quiet, anti-rattling operation, rock light provisions and hexagonal vents that allow airflow to reduce under-hood temps. The powder coated black mesh panels top off the sleek appearance that will set your JK apart from the rest.

- Protect engine bay from debris and contamination
- Recessed rock light provisions
- Trimmed to fit with most coil over systems or stock shocks
- Works with XRC fenders, OE fenders and Gen2 Armors
- Vented to reduce under hood temps
- Powder coated black
- Corrosion resistant aluminum
