

# M1A2 SIDE STEPS

The M1A2 family is completed with the matching side steps, with large radius bends that match the bumpers. The steps mount high and tight for optimal clearance and the .188" thick mounting brackets ensure a strong, rigid hold with minimal movement. The bolt-on step plate has a unique hexagonal pattern mirroring the bumpers' mesh panels and the distinctive M1A2 logo illuminates whenever your door opens.

- A** Large radius bends to complement the M1A2 bumpers
- B** Wired to illuminate when doors open
- C** Honeycomb tread pattern matches M1A2 bumper mesh
- D** Vehicle specific mounting brackets
- E** Uniquely designed large footprint step pad made of high density rubber
- F** Impact-resistant and high traction contact step points
- G** High and tight design for clearance
- H** Rigid design for minimized movement
- I** Pinch-weld mount with OEM studs/hardware
- J** Easy bolt-on installation

**3 STAGE TREATMENT**  
 Dual stage powdercoating  
 Special "E-Coat" inside & out  
 Acid dipped to remove impurities
